

Abstract

5 The palletless rack type parking system is comprising of plural fork bars
arranged with a right angle to the car, and the fork bars comprising a front fork row
for sustaining front wheels of the car and a rear fork row for sustaining rear wheels
of the car; longitudinal beam arranged in a right angle against the fork bar, and
supporting below the fork bar; plural rollers being arranged along a width of the fork
bar, the upper portion of the roller protruding above the top of the fork bar so as to
allow wheels of the car to be rolling-contacted; a floor covering above the
10 longitudinal beam of the parking space except the fork bar row area; and a position
adjustment unit for transferring the car along the longitudinal direction of the fork
bar so as to park the car on the accurate place.
